```
 PostgreSQL printed recovery checklist

 Restore the base backup before replaying archived WAL.

 SCAN_RECOVERY_MARKER identifies the printed recovery procedure.

 SELECT pg_switch_wal();

 Keep transaction logs until the recovery check succeeds.
```

```
const value = foo?.bar ?? baz;
```

```
SELECT array[1] || array[2];
```

```
int* p = &x; if (a != b && p->value) return p;
```

```
SELECT 'foo-bar'::text, a->>'key';
```
